

Small & Medium Utility Trial Membership

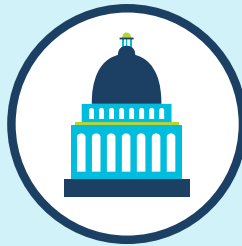

NACWA's Utility Leaders Have Made it Clear:
They Want Every Clean Water Utility to Be a Member. Why?

Strength in Community

Multiple venues for direct and digital peer-to-peer networking, national awards programs, dedicated staff and more allow you to choose your level of engagement and move your utility forward.

Strength in Advocacy

As the nation's recognized leader in legislative, regulatory and legal advocacy, NACWA is your voice to Congress, EPA and government agencies; and we need each and every utility's voice to advance our clean water objectives.

Strength in Resources

A wide array of invaluable publications, alerts, legal references and resources ensure that your utility has the tools to make the best decisions.

Your organization can experience the full member advantage at a small fraction of the price. While the Small & Medium Utility Trial Membership program lasts, NACWA is offering a dues rate of between \$750 and \$1,000 per year. This value is offered exclusively to small and medium-sized wastewater/stormwater utilities serving populations of 75,000 or less.

All utilities benefit from NACWA's work, our vision is for all to be a member of NACWA.

Membership Development

"NACWA was the voice for all utilities that faced nutrient reductions to protect the Chesapeake Bay..."

Susanne Lawton, General Manager
Jefferson County Public Service District, WV
Population Served: 6,250

"NACWA recently [addressed] a budget rider [that] could have cost Great Lakes' utilities \$70 billion. Together we were able to significantly change the language..."

Todd A. Danielson, P.E., BCEE, Chief Utilities Executive
Avon Lake Regional Water, OH
Population Served: 27,700

"NACWA has been our District's voice in Washington for over 20 years... helping us stay ahead of the curve on regulations."

Susan Tanner Holmes, Chairwoman
Central Davis Sewer District, UT
Population Served: 42,000
