Optional Lunch – Hosted by the Water Collaborative Delivery Association: Better Projects, Together: Organizational Readiness for Collaborative Delivery Success (Free; Separate RSVP Required)

Is your utility ready to deliver a successful collaborative delivery project? Similar to other types of water sector innovation, utilities are at various levels of maturity with respect to their experience with collaborative delivery and successful project implementation. Recent research to identify and address critical utility readiness factors driving collaborative delivery implementation success found that readiness factors can be grouped into the three categories of people, processes, and tools. Join the Water Collaborative Delivery Association for a free lunch session to learn more about how utilities can prepare, assess, and align to address readiness gaps for successful collaborative delivery project implementation. All attendees will receive a copy of WCDA's *Water and Wastewater Collaborative Delivery Handbook, 6th Edition*.

Please complete [this form](#) by **July 14** to RSVP for this event.

Success in Uncertainty: Leadership, Systems Thinking, and the Future-Ready Utility

Uncertainty is becoming the new normal for clean water utilities who are on the front lines delivering exceptional environmental and public health protection 24/7/365. Whether it's shifting regulations, workforce changes, extreme weather or emerging contaminants, with the right mindset and tools, these challenges can become opportunities for leaders to re-think how the work gets done. Through real-world examples and candid discussion, speakers will share how they are turning uncertainty into opportunity, building more resilient organizations, and delivering lasting improvements for the communities they serve.

Stronger Together: Managing Costs, Protecting Funding, and Building Smarter

How is the private sector stepping up to tackle rising costs faced by the clean water community? Discover why a unified public-private front isn't just helpful but essential to navigating today's toughest infrastructure and affordability challenges.

Featured Speaker

John McCarthy, President, Water Business Line
Arcadis | New York, NY

3:15 – 4:15

Smarter Together: Rethinking Governance for Utility Success

Behind every successful clean water utility is a governance model that works. Yet politics and infrastructure are interlinked – and the way clean water utilities are governed often reflects competing priorities, unclear authorities, and shifting public expectations. This panel will explore candidly how governance structures – the good and the bad – empower or inhibit progress for communities.

Taking Care of the Heart, Brain & Engine of Our Utility: Investing in Our People

Public wastewater utilities are at a critical juncture with close to half of the workforce eligible for retirement in the next decade. Hiring qualified staff before losing institutional knowledge is paramount and it is past time to think outside the box on how we attract, retain, and cultivate our next generation of leaders. Panelists will share real world examples and practical tactics they are using now to help future proof their workforce and sustain their utility's mission for decades to come.

When the Going Gets Tough, the Tough Get Going: Making the Business Case for Clean Water

This year's conference theme hits home – with shrinking federal budgets, infrastructure that is aging, increasing regulatory requirements, and experienced workers who are exiting, we are definitely in uncertain times. So how do you make the business case that clean water solutions aren't just necessary, but more than worth the investment? This panel brings together private sector leaders to share how they are helping utilities stay resilient by making a strong, clear business case for clean water.

Tech It to the Limit: From Innovation to Impact

Technology is supposed to make things easier, but it often takes time, adaptation, and grit to get there. With today's realities, clean water utility leaders are under extreme pressure to make smart decisions and do so with less. But how do utility leaders know what technologies are best? This session dives into how forward-thinking utilities and partners are pushing past those barriers and putting new technology to work to make lasting impacts in their communities.
